RVS1000

An IP PBX designed to expand the capabilities of any business.

All Inclusive Complete Business Communications Solution
The RFCVoip RVS1000 is a powerful business communications platform.
An IP PBX designed to expand the capabilities of any business, RFCVoip
extends the power of IP Telephony to businesses with up to 250 users. The
RVS1000 converges the present with the future in business telecommunica-
tions and will grow with your business assuring a smooth transition into the
future. With features designed for today's complex business environment
and flexible capabilities for all of your future needs, RFCVoip is the smart
choice for business telecommunications.

**With the RVS1000 managers and business owners have instant insight
into employee status any time, any where…** who's on the phone … who's
away from their desks … when calls are going unanswered. With valuable
information like that, your business can respond immediately to changes in
customer and market demands, giving you that all important edge over your
competitors.

**Communicate quickly, simply across your entire company whether
employees are in the office, on the road, or telecommuting from home.**
Your communications world just got a lot smaller. RFCVoip's RVS1000
leverages IP telephony and SIP technology to make state-of-the-art tools like
softphones, remote phones, and branch office networking practical and af-
fordable solutions for entrepreneurial business owners who want the best.
Wherever your employees are located, with the RVS1000 they can now
communicate with each other just as if they were in the same physical
location.

Model T48G
Color LCD w/Touchscreen Simplicity

Your customers appreciate efficiency.
Features like Follow-Me forwarding, unified messaging, remote stations and presence management, assure that your customers and prospects will experience the ultimate in customer service and return again and again to do business with you.

Investment protection is the name of the game.
Industry-tested and proven in hundreds of thousands of installations around the world, the open standards architecture on which the RVS1000 is built will ensure that the IP PBX in which you invest today will remain a viable and valuable business asset now and in the future, but also that you will always be able to take advantage of the latest and greatest in technological advancements and feature enhancements. RVS1000 uses the SIP protocol. This provides easy access to a world of exciting products and services like SIP Trunks that save money and increase productivity now and in the future.

Smartphone App

With the RVS1000, you are in control.
You choose the pace at which you introduce new features and functionality into your business. The RVS1000 has all the functionality built-in and ready for you when you want it. Use traditional dial tone or move to SIP Trunks. Want your voice mails to be delivered by email? No problem, it's included. Advanced features like follow-me, Music on Hold, Conferencing are all included. Soft Phones can be used for a great alternative for traveling employees. RVS1000 includes tools to allow your employees to control their phone features, forwarding and Voice Mail from an easy to use web page.

Multi Site Integration - On the Go Access
Sites in town, sites in the state, and sites across the country are all easily integrated with the RVS1000. Whether it's a single territory sales manager working from a small office out east or the entire Western Region Distribution Center the RVS1000 will allow all user to communicate seemlessly. Leverage the power of your smart phone with our SIP Client App. Check messages and talk to fellow employees without using any airtime minutes.

RVS1000 - Make the Most Out of Open Standards
Don't get stuck in the past with equipment that is already obsolete. RVS1000 is state of the art and will keep your investment working for you now and into the future
